Please feel free to contact us if you need assistance with your community health needs assessment requirement.

Let us assist you!
WHO WE ARE

The Public Policy Research Institute (PPRI) is an applied, policy-relevant research organization. PPRI provides scientific research and program evaluation services to both public and private sponsors including various federal, regional, state, and community agencies actively engaged in determining public policy.

WHAT WE PROVIDE

PPRI’s qualified needs assessment research professionals use valid social scientific designs and protocols to address the organizational needs of our clients. We provide a full analytical report based on the findings of our project. We also provide on-site professional presentation to leadership teams. Our approach is not a “one size fits all” study but we specifically develop our program evaluation and needs assessment designs to appropriately fit the mission and needs of a specific organization and its targeted community. No community needs assessment is too small or too big for us.
